Building **Quality** Structures.
Delivering Lasting **Value**.

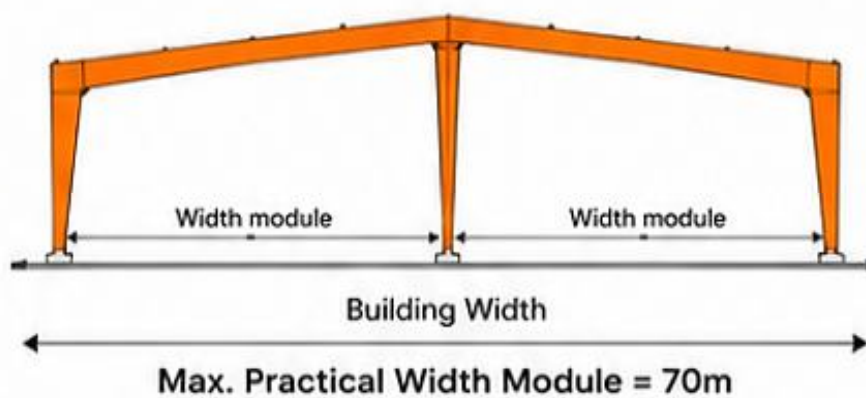

PRIMARY FRAMING SYSTEMS

The most common primary framing systems are shown. All shown symmetrical about the ridge line. Framing systems unsymmetrical about the ridge line and multi span framing systems with unequal width modules are also possible. Practically, any frame is possible.

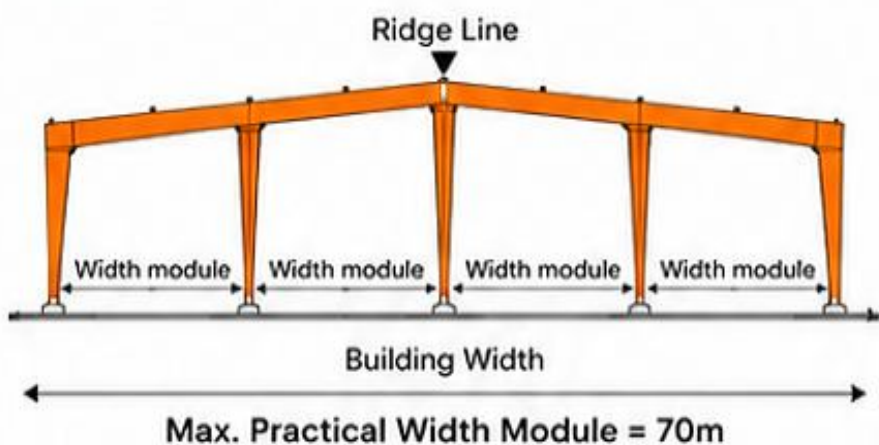

CLEAR SPAN (CS)

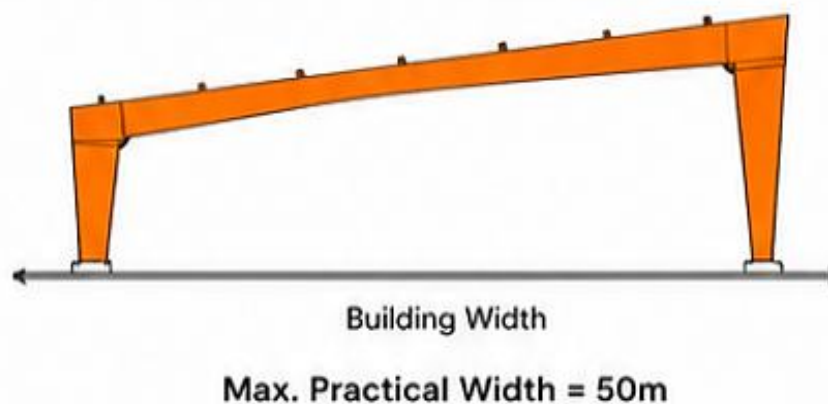

MULTI SPAN "1" (MS-1)

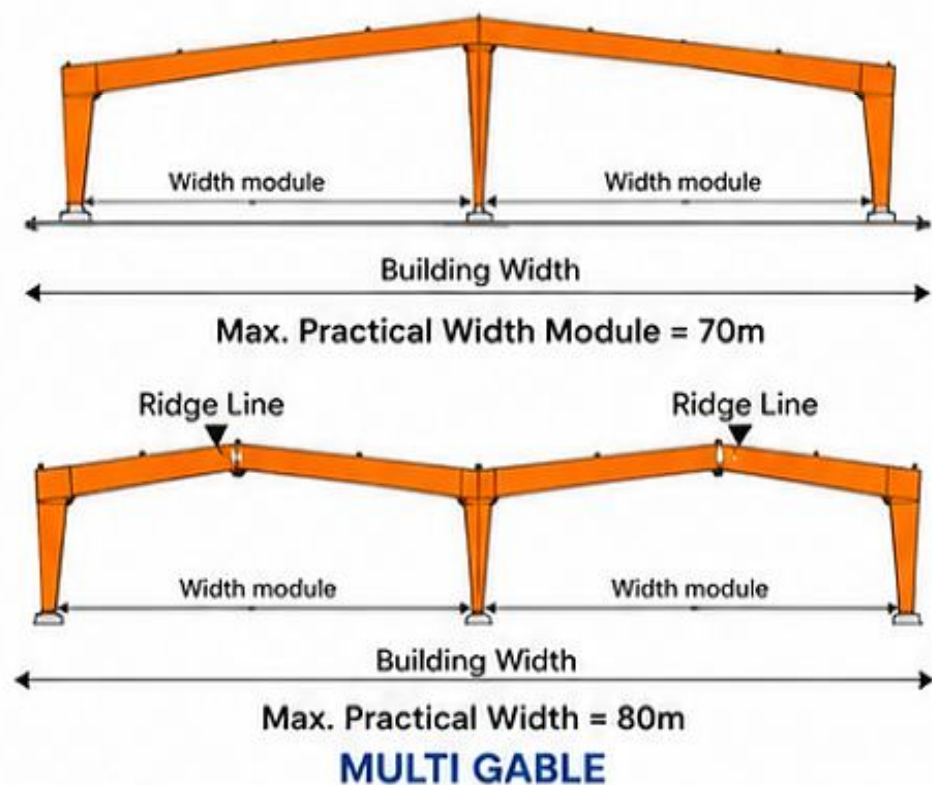

MULTI SPAN "3" (MS-3)

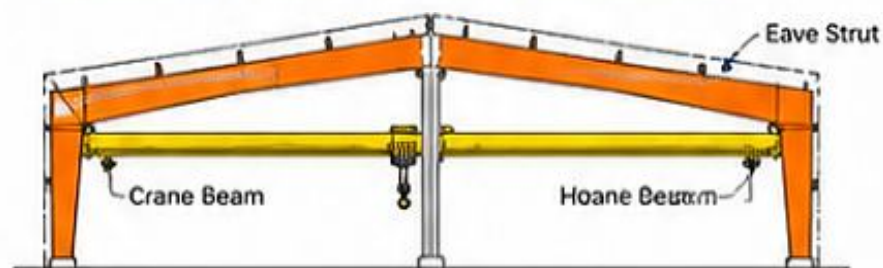

SINGLE SLOPE

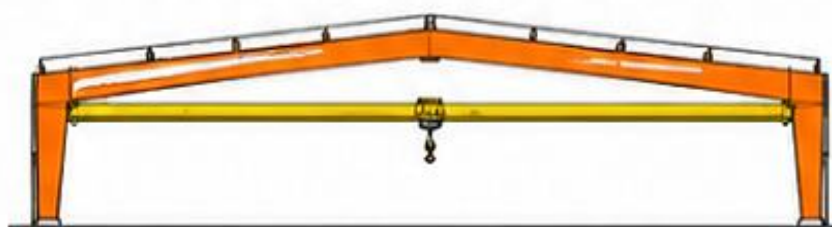

MULTI SPAN "2" (MS-2)

Top Running Crane in a Multi-span Building

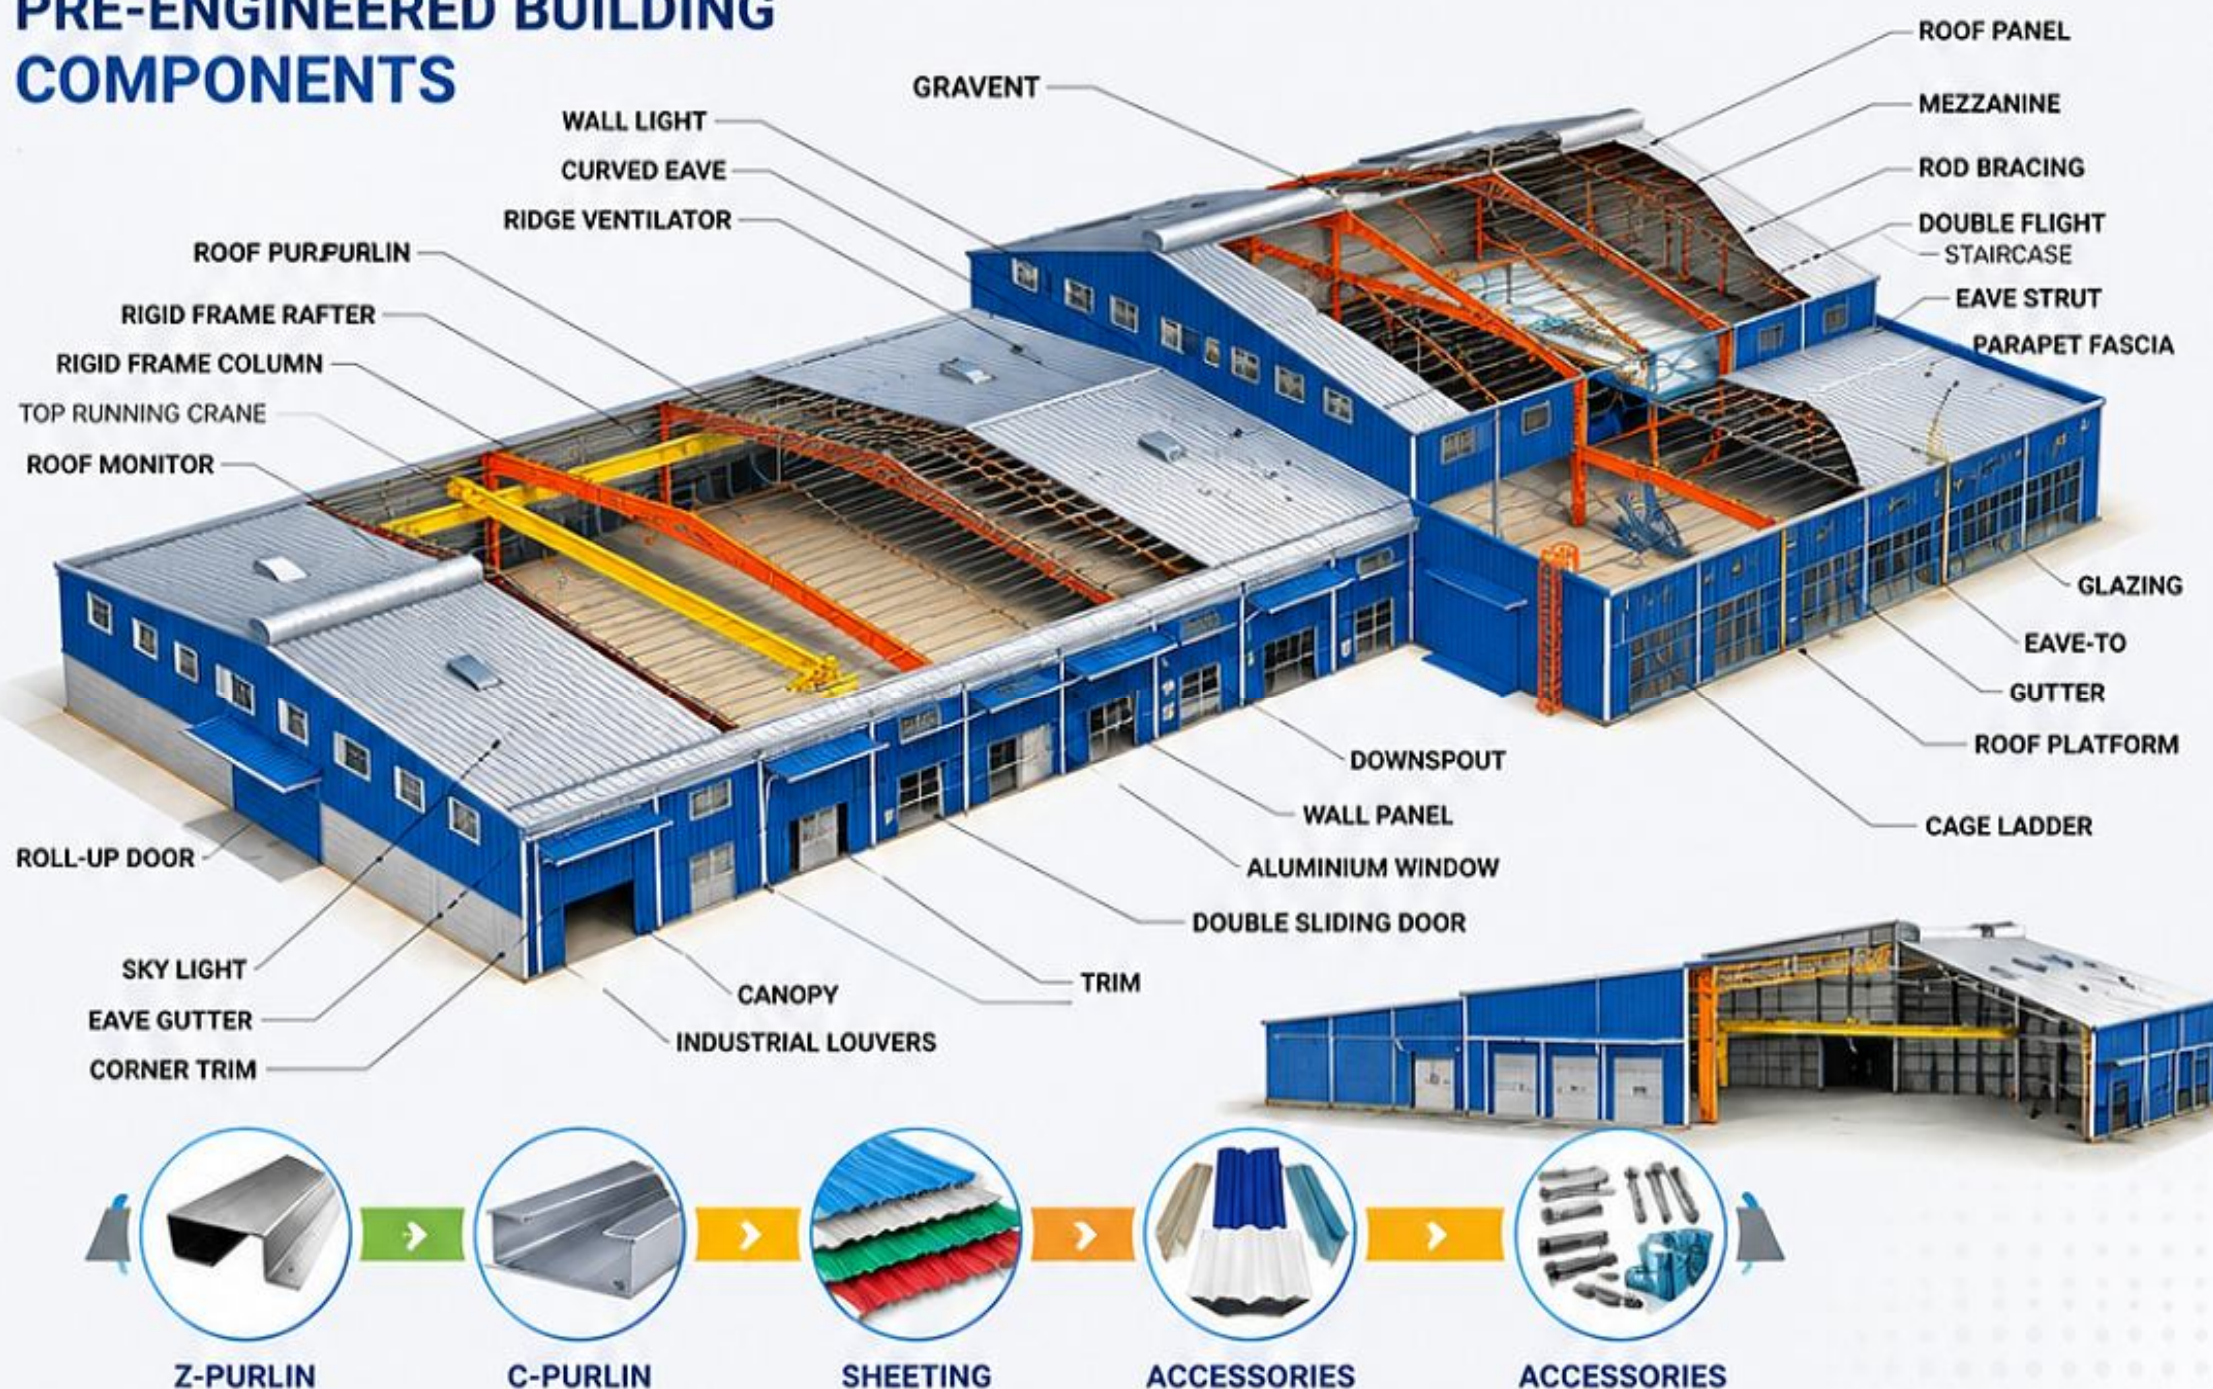

Top Running Crane in a Clear-span Building

All structures are designed as per relevant codes and standards ensuring strength, safety and durability for all types of applications.

PRE-ENGINEERED BUILDING COMPONENTS

OUR PROJECTS BUILT TO PERFECTION

Superior Strength
Engineered for durability and long-lasting performance.

Precision Engineering
Designed with accuracy for maximum efficiency.

Cost Effective
Smart construction solutions that save time and cost.

Timely Delivery
On-time project completion with uncompromised quality.

Safe Construction
We build with safety in every step.

Quality Assured
Premium materials and industry best practices.

Customer Satisfaction
Committed to delivering excellence every time.
